

Liber Loagaeth

**An Enochian Prophecy on the cosmogony of the Universe
In the Merkabic Tradition**

Loagaeth: Enochian Prophecy “A Book of Secrets & the Key of this World”

Introduction

Do what thou wilt shall be the whole of the Law.

This book, and holy key, which unlocketh the secrets of God His determination—as concerning the beginning, present being, and end of this world—is so reverent and holy, that I wonder (I speak in your sense) why it is delivered to those that shall decay. So excellent and great are the Mysteries therein contained, above the capacity of man. [*Five Books of Mystery*, p.393]

The Angel Galvah, communicating this book to John Dee, says of Liber Loagaeth (pronounced Logah) that it is “Speech from God”; clearly indicating the prophetic nature of the work and the singular importance of the *First Leaf*.

Behold! Behold, yea, let Heaven and earth behold: For with this, they were created. And it is the voice and speech of Him, which proceeded from the First, and is the First, whose glorious Name be exalted in his own horn of honor. Lo, this it is. And it is the truth; whose truth shall endure forever. [*Five Books of Mystery*, p.268]

This holy book is said to contain three types of revelation; the knowledge of God, the numeration and doings of its angels and the formation and demise of nature. So the book is also an outline of an eschatology; not all that different from the apocalypses of the pseudepigraphic literature of the late, pre-Christian era.

And of the *First Leaf*, Galvah said: “it is the last of the book,” having an uncanny parallel with the biblical notion that those who are seated last shall be seated first. This is an overall allusion to the Great Work that is the uniting of Heaven and Earth; the ‘above and below,’ per the Qabalistic axiom: *Kether is in Malkuth and Malkuth is in Kether, but after a different fashion*. Galvah’s proclamation may be taken to mean that the *First Leaf* is the summation of the prophecy and/or a key to that prophecy of Liber Loagaeth; being its conclusion. But most important, Galvah said of *Loagaeth*: “**Out of this shall be restored the holy books, which have perished even from the beginning, and from the first that lived. And herein shall be deciphered perfect truth from imperfect falsehood.**”

The Angel Nalvage says of the First Leaf: “I find the soul of man hath no portion in this First Table. It is the Image of the Son of God, in the bosom of his father, before all the worlds. It comprehendeth his incarnation, passion, and return to judgment: which he himself, in flesh, knoweth not.” In this we can determine the *Logos* before the act of creation and before the Ain Soph Aur would cast a reflection of itself (as Kether) that it might then comprehend itself. This of course, is the first spiritual act for us all, per the Hermetic Axiom: *Know Thyself*.

The problem with the first leaf; being arranged into words as with the tablets that comprise all but the first two leaves of Loagaeth, is that there are a host of words that have no translation readily available. But using Qabalistic and etymological techniques, these words can be translated, using

words that already exist in the language; adding new words into the lexicon. What follows here is an attempt at this with an explanation of the techniques used to do this; and a commentary on the verses themselves. Immediately, upon completing the interpretation of the first paragraph, it becomes clear that Loagaeth is detailing a cosmogony represented symbolically by the *Sigillum Dei Aemeth*. This seems a strong indicator that the correct approach to the interpretation of this coded revelation has been found. And just as strong a verification is the fact that the entire Enochian system is built on the *Sigillum Dei Aemeth*; being literally the support for the work as symbolically expressed through the placement of sigils under each leg of the *Holy Table of Practice* and under the magick mirror itself.

What is being detailed as we begin to translate and decode the work is a hekalothic mythos and cosmogony of the creation of Earth and Heaven; its angels being described as the Children of Light. There is a marvelous parallel with the esoteric Buddhist prophecy as expounded by Madame Helena Petrovna Blavatsky, but more from a uniquely Western perspective. It then also becomes natural to interpret this work in terms of Liber XXX Aerum vel Saecvli Sv̄b Figvra CCCCXVIII; The Vision & the Voice, which goes to the heart of Thelemic Doctrine as revealed to the Master Therion in his skrying to the thirty Aethyrs.

The Forty-Ninth Table

The Angel Galvah in referring to this table says, while a beam of light shoot out from her mouth: *"The first leaf (as you call it) is the last of the Book. And as the first leaf is a hotchpot without order; so it signifieth a disorder of the World, and is the speech of the Disorder or Prophetie. Write the Book (after your order) backward, but alter not the form of letters, I speak in respect of the places... Write the forty-nine. You have but forty-eight already."* And as the angel delivered this table, her head was described by Edward Kelly to be (as described by Dr. Dee in his diary) *"on bright fire, that it cannot be looked upon: The fire so sparkleth and glisteth as when an hot iron is smitten on an Anvil, & especially at the pronouncing of every word. It is to be noted also that upon the pronouncing of some words, the Beasts and all Creatures of the World every one shewed themselves in their kind and form: But notably all Serpents, Dragons, Toads, and all ugly and hideous shapes of beasts; which all made most ugly countenances, in a manner assailing E. K. but contrariwise coming to, and fawning upon Galvah. It is to be noted also that by degrees came a second beame, and a third beame of light into Galvah from the Stone, and all the three together appeared: the third participating of the other two. The second beame came at the word Larb, pronounced; when also Frogs and Serpents appeared, &c. The third beame upon the word Exi pronounced. Note also, that the manner of the fiery brightness was such, and the grisly countenances of the Monsters was so tedious and grievous and displeasing to E.K. that partly the very grief of his minde and body, and partly the suspecting the Creatures to be no good Creatures, neither such grievous sights necessary to be exhibited with the Mysteries delivering unto us, had in a manner forced him to leave off all: But I again with reasonable exhorting of him, and partly the providence and decree Divine, wrought some mitigating of his grief and disquieting."*

Dee asks what to do with the twenty-one words “now received” (note Loagaeth, the title of this holy book gives us a 22nd word that is also the first word of this table—and there is no A & B sides to this table—it is ‘one’) and is answered by Galvah: “There are onely the words of the first leaf.” It’s as if these words in themselves suggest a summary of the entire book, which may be why Loagaeth is the first word. The play on the first and last is also in reference to this last table as being the first. This connects this table intimately with the First Leaf; completing a circle—the Serpent eating its tale.

Dee then asks how he shall “bestow them, or place them” and Galvah responds: “*In them is the Divinity of ht eTrinity. The Myserie of our Creation. The age of many years. And the conclusion of the World. Of me they are honoured, but of me, not to be uttered: Neither did I disclose them my self: For, they are the beams of my understanding, and the Fountain from whence I water.*” This certainly suggests words of power. And for that matter, the dialogue continues with the angel ultimately giving instructions to formulate the letters of these words into five triangular tables, as follows (note ‘Loagaeth’ is not used):

TABLES OF SOYGA

Amzes naghezes Hardeh

*'Oh, my great and long desyre hath byn to
be hable to read those tables of Soyga'.
John Dee*

Until recently the Book of Soyga was known only because it was mentioned in the diaries of John Dee. At one point, Dee sought and couldn't find his copy of this book; later, remembering a detail about the missing book in his diary:

'...E[dward] K[elley] and I wer talking of my boke Soyga, or Aldaraia and I at length sayd that, (as far as I did remember) Zadzaczadlin, was Adam by the Alphabet therof...'

Modern scholars could only guess about its contents and possible influence on Dee's magic system, until its discovery in 1994. We now know that the Book of Soyga is an anonymous late-mediaeval or early modern Latin magical work that primarily deals with astrology and demonology; containing long lists of conjunctions, lunar mansions, names and genealogies of angels, and invocations. Some of the spells or incantations have a vaguely Christian or Alchemical air to them; consistent with the Magick of Dee's era.

Several features of the Book of Soyga differentiate themselves from standard late Mediaeval and Renaissance magical grimoires. In contrast to these works, the text has extremely few references to known authors or personalities. It is perhaps this that made the book so special to Dee. Obviously, it is a book that greatly influenced Dee's approach to Magick and evocatory work, as is shown here, the similarities between this book and Dee's Enochian work holds some interesting parallels.

Throughout the book much importance is placed on writing words backwards. Recursive phrases appear throughout its tables. There is a preoccupation with letters and combinations of letters, assignments of numerical values to letters, assigning letters to planets and to elements, listing combinations of letters associated with houses of the moon, recombining letters and syllables in incantations to form new magic words, listing new names for the 23 letters of the Latin alphabet, sometimes taken in a reversed alphabetical order, listing new symbols for the 23 letters, and so on. And, towards the end of the book there is the set of thirty-six large square tables, filled with a seemingly random jumble of letters. These tables do not appear to be like any others that could have been known to Dee at that time.

The Book of Soyga's preoccupation with letters, alphabet arithmetic, Hebrew-like backwards writing, and so on, is of course characteristic of the new Cabalistic magic which became popular in the sixteenth century. Although large square tables are not themselves a characteristic feature of the traditional Kabbalah, they had by Agrippa's time become an integral part of the Christian magical Cabala.

The Book of Soyga contains thirty-six tables; each table is a square grid of 36 rows and columns; each grid cell contains a letter of the Latin alphabet. These tables turn out to be formed by a completely deterministic calculation method, or algorithm, starting from

an arbitrary 'code word' for each table. This construction algorithm is so intricate that it is unlikely that its presence would be detected on casual examination of the tables.

Each of the thirty-six tables is headed with a number and a label as shown below:

- 1 Aries NISRAM 180r 102v/103r 58v
- 2 Taurus ROELER 180v 103v/104r 60v

The left hand margin in each table is special. Each table has a 'code word', e.g., In the First Table, 'Aries' has code word NISRAM. The left margin is composed entirely of the code word and the reversed code word, e.g., NISRAM MARSIN NISRAM MARSIN ... repeated until the margin is filled. All thirty-six of them are exactly 6 letters long. The

treatise in the Book of Soyga which discusses the tables, 'Liber Radiorum', has a series of paragraphs mentioning the code words for twenty-three of the tables, together with number sequences which stand in unknown relation to the words.

Various other less pronounced repetitious structures can also be seen in the tables. Repetitions found in the text could be sought, patterns counted, and proof sheets printed.

Most of Dee's tables in the Book of Enoch are unpatterned: squares and lozenge shaped arrays with 49 rows and columns filled with text in the 'Enochian' language described by Laycock and Whitby. The text is inscribed in the tables line by line, left to right, one letter per cell, with no space between words. The eight Soyga tables appearing in the same book are of course patterned, but with a hidden pattern. The fact that Dee's work would 'open the Gate' for BABALON, the table size of 49 is quite interesting. Just as interesting, is the fact that Dee used 40 and Soyga used 36; both numbers giving up a whole number for its square root. Soyga uses 36 or 6x6 and Loagaeth uses 49 or 7x7, which is the next perfect square after 36. Similarly there are also 36 Soyga tables and 49 Loagaeth tables.
